
Participant's Guide **2017**

The Quebec City Conference
Quebec City | 25-26 april 2017

Tech Innovation Platform (TIP)
**Ecosystem
Building Forum**

Dear TIP Participant,

It is our great pleasure to welcome you to this second edition of the TIP Ecosystem Building Forum (“EBF”).

Building on the experience of two platforms created by the Quebec City Conference: the Public Policy Forum on Venture Capital and Innovation (“PPF”) and the Institutional Investors Roundtable (“IIR”), the Tech Innovation Platform (“TIP”) aims to bring together leading stakeholders of tech innovation ecosystems (corporations, universities, investors, governments and ecosystem leadership) in order to foster collaboration and accelerate the development of these ecosystems.

The TIP is not a conference, it is a platform. Its objective goes beyond sharing information and best practices: it is to address the lingering productivity and innovation gaps and enhance the innovation agenda across the country.

Such an ambitious objective can only be achieved by joining forces and engaging the leaders of the main groups of stakeholders of the tech innovation ecosystems in structured conversations designed to lead to tangible results beyond the TIP meeting itself.

The TIP has two components:

- The TIP Leadership Roundtable (“LR”), a roundtable designed for senior decision-makers focusing on strategic issues;
- The Ecosystem Building Forum (“EBF”) positioned at the operational level and focussing on tangible ways: (i) to enhance the effectiveness of organizations and initiatives that are the building blocks of tech innovation ecosystems, and (ii) to foster synergies among them.

This year, the EBF will focus on initiatives and best practices to accelerate the development of stronger ecosystems around Datascience/AI. International best practices and most Canadian initiatives to build a strong deal-flow around Canadian assets in research will be reviewed and investors specialized in this field will be present.

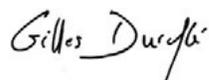

As we all know, Canada is a hotspot for research in AI with the teams of Yoshua Bengio in Montreal, Geoffrey Hinton in Toronto and the team in the University of Alberta, and there is strong will on the part of governments, corporations and universities to leverage these assets to produce economic and commercial value. They are looking for best avenues to reach this goal. The most significant initiatives developed at present in Canada (in Quebec, Ontario, Alberta and BC) will be represented at the Forum as well as many policy designers, academic leaders and investors. The TIP will be a great opportunity to learn from one another and from international experiences and to foster collaboration.

We would like to thank all those who contributed to this forum: our Advisory Committee, as well as the directors of the Quebec City Conference who have enthusiastically supported this initiative.

In closing, we would like to underline the contribution of the Governments of Quebec, Ontario, Canada and British Columbia which partnered with the Quebec City Conference to develop this platform and have provided considerable financial support.

We hope that together we shall make this second edition promising and stimulating.

We wish you a very pleasant stay in Quebec City.

Gilles Duruflé
President
TIP Ecosystem Building Forum

Christian Racicot
Co-Founder & President
The Quebec City Conference

Executive Summary

The challenge

- Canada is distinguishing itself from most other post-industrial countries by its inability to adapt to a world whose wealth is increasingly driven by innovation (“Innovation Gap”). This is a serious and important national challenge that needs to be addressed.
- A key when addressing this challenge is to recognize that any vibrant tech innovation ecosystem requires a structured and continued form of collaboration among and between the following four main groups of stakeholders impacting all tech ecosystems, as shown in the diagram attached to this document as **Appendix 1**:
 - Group 1: Large corporations impacted by tech innovation;
 - Group 2: Public policy makers (governments);
 - Group 3: Leading universities and research centers;
 - Group 4: Leading investors: large scale, long-term capital (institutional investors) and “smart money” (specialized VC’s and business angels).
- Such collaboration is present in successful tech innovation ecosystems such as Silicon Valley, where a critical mass of start-ups, investors and global tech corporations are concentrated and where a culture of innovation within large corporations and a wide circulation of talent among all stakeholders already exist.
- Weak interaction in Canada among the leaders of the four groups of stakeholders impacting tech innovation both from the private and public sides, compounded by geographic constraints and a decentralized structure of government, make this type of collaboration very difficult in our country.
- As a result, Canada’s approach to the opportunities and challenges from tech innovation has been so far fragmented and predominantly regionally focussed, either by province or by metropolitan area.

Proposed solution: The Tech Innovation Platform (TIP)

- It is recognized that structured and continued interaction within and among the leaders of the four main groups of stakeholders of the tech innovation ecosystems Canada is needed but that, for the reasons noted above the path for a solution needs to be deliberately provoked through coordinated action and leadership.
- The solution is to provoke a structured interaction among the leaders of the four main groups of stakeholders of Canadian tech innovation ecosystems, both from the public and private sides, by creating a national platform (the “Platform”) to address the priority initiatives around tech innovation that are essential to the development of the Canadian economy. This will create continuing and result-driven discussions, through a nationwide “ecosystem/cluster strategy”.
- An explanation of the need for a nationwide “ecosystem/cluster strategy” and how a Tech Innovation Platform can address this need is included in Deloitte’s white paper: “Future of Canada - A blueprint for Growth”.
- **The Tech Innovation Platform (TIP)** has for objective to meet this need. Its mission is foster collaboration on a continued basis among the leaders of the four groups of stakeholders of the Canadian tech innovation ecosystem (corporations impacted by tech innovation, leading universities, investors, policy designers and ecosystem builders)

to address the most important opportunities and challenges of this ecosystem by way of structured, continued and result-driven discussions.

- The TIP has two components:
 - The **TIP Leadership Roundtable**, a roundtable designed for senior decision-makers focusing on strategic issues;
 - Customized forums positioned at the operational level and focussing on tangible ways: (i) to enhance the effectiveness of organizations and initiatives that are the building blocks of tech innovation ecosystems, and (ii) to foster synergies among them. The first such forum is the **TIP Ecosystem Building Forum**.

The TIP Ecosystem Building Forum

The **Ecosystem Building Forum** is by-invitation only and brings together operators and stakeholders of leading regional tech ecosystems to exchange views on best practices and explore ways to collaborate in a mutually beneficial way. International best practices will also be invited when relevant for the topics that have been selected. Initiatives under consideration include:

- (i) helping start-ups to interface more efficiently with large corporations,
- (ii) helping all stakeholder groups to take advantage of organized tech hubs,
- (iii) initiatives to foster entrepreneurship within universities and accelerate tech transfers,
- (iv) helping tech start-ups understand better the financing chain and access more efficiently suitable sources of capital;
- (v) considering innovative models to address gaps in the regional or national tech ecosystems; and
- (vi) generally, exploring how these regional ecosystems may collaborate on tangible proposals to achieve these objectives.

The choice of themes and initiatives under consideration for any year will be informed by pre-meeting interviews conducted by the Secretariat. As the Leadership Roundtable develops, there will some convergence between topics debated at the Leadership roundtable and initiatives discussed at the Ecosystem Building Forum

2017 focus: Datascience/Artificial Intelligence

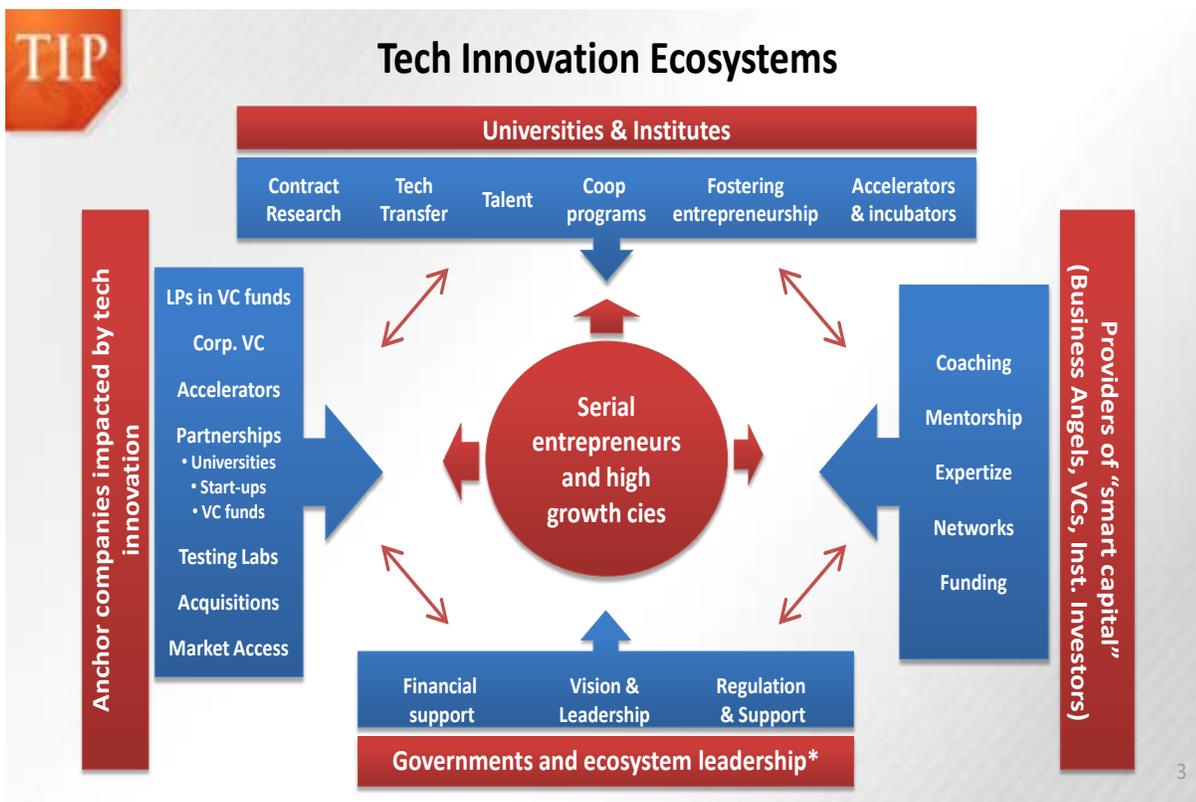

As over the last couple of years AI was becoming a hot topic, Canada discovered that it is home to some of the strongest research teams in this domain and series of initiatives were started across the country to build clusters around these research assets. Artificial intelligence is just one part of the broader field of Datascience where there are very strong research teams all across Canada.

The objective of this year's forum will be to bring together the most significant of these initiatives, their promoters as well as the leading stakeholders (investors, companies, universities) that are involved with them, in order to share information, highlight their models, learn from their success and failures, and stimulate collaboration among them to build a stronger Canadian ecosystem. International best practices will also be brought in order to feed the debate.

Beyond learning from best practices and exchanges, one of the main objectives of the Forum will be to point out ways to foster a more efficient collaboration among initiatives and accelerate the development of buoyant Canadian clusters that can thrive and compete internationally.

APPENDIX 1:

The four main groups of stakeholders impacting any tech innovation ecosystem

Useful information

About Quebec City

Quebec City is the birthplace of French civilization in North America and is the only fortified city on the continent. In 1985, it was proclaimed “World Heritage Site” by UNESCO. As the Château Frontenac is in the heart of the old town, several activities are at your fingertips. With Spring starting to blossom, Quebec City is yours to discover.

For more information about Historic Quebec City or for activities and attractions ideas, please visit <http://www.quebecregion.com/en>.

We hope you'll enjoy your stay in our beautiful National Capital.

TIP Check-in and Registration – Main Lobby

TIP Registration will take place in the main lobby on April 25th and 26th.

You will receive your badge and agenda. All participants are required to wear their badge at all times.

Internet access, computers and printers

Internet access is available in guestrooms and in all meeting rooms of the hotel. Access codes are available on demand. Please refer to the information/registration desk.

The Business Center: work stations with high speed internet access, photocopy and fax services are available 24/7. Present yourself at the Front Desk for details.

Luggage storage

Should you require a secured place to store your luggage throughout the day, please see the hotel concierge for assistance.

Medical assistance

A doctor is available 24/7 at the Château Frontenac. If you need any medical assistance, you can use a hotel phone and dial 0 or go to the Front desk. If possible, please also contact us at the information/registration desk.

Questions and Information

If you have any questions or concerns, or if you need any information about the program, the agenda, your hotel reservation, nearby restaurants, etc., please refer to our information/registration desk.

MEETING AGENDA

TIP ECOSYSTEM BUILDING FORUM – APRIL 25-26, 2017

Venue & Accommodation: Fairmont Le Château Frontenac, 1 Rue des Carrières, Quebec City, G1R 4P5

Attire: business casual

The **Ecosystem Building Forum** is by-invitation only and brings together operators and stakeholders of leading regional tech ecosystems to exchange views on best practices and explore ways to collaborate in a mutually beneficial way. International best practices are also presented and discussed when relevant for the topics that have been selected.

The 2017 edition is focusing mainly on initiatives and best practices to accelerate the development of stronger ecosystems around Datascience/AI. International best practices and most Canadian initiatives to build a strong deal-flow around Canadian assets in research will be reviewed.

As we all know, Canada is a hotspot for research in AI with the teams of Yoshua Bengio in Montreal, Geoffrey Hinton in Toronto and the team in the University of Alberta, and there is strong will on the part of governments, corporations and universities to leverage these assets to produce economic and commercial value. They are looking for best avenues to reach this goal. The most significant initiatives developed at present in Canada (in Quebec, Ontario, Alberta and BC) will be represented at the Forum as well as many policy designers, academic leaders and investors. The TIP will be an excellent opportunity to learn from one another and from international experiences and to foster collaboration.

The second part of the Forum is dedicated to panels and discussions that will follow up on the discussions of last year's TIP on models to stimulate the development of start-up ecosystems and to link corporations with these ecosystems: What have we learnt? What progress have we made? What are the next steps?

TUESDAY, APRIL 25 – WELCOME DINNER

Time	Event	Venue
ALL DAY	TIP Guests Arrivals	Fairmont Le Château Frontenac
6:00 pm	TIP PRIVATE COCKTAIL	Salon Rose – 2 nd floor
7:00 pm	TIP PRIVATE DINNER Welcome Remarks:  Gilles Duruflé <i>Executive Vice President, Quebec City Conference President, TIP Ecosystem Building Forum</i>	Jacques-Cartier Room - Lobby Level

WEDNESDAY, APRIL 26 – TIP ECOSYSTEM BUILDING FORUM

Time	Event	Venue
7:00 am – 8:30 am	BREAKFAST – Buffet-style breakfast available	Champlain Restaurant – Lobby Level
8:30 am	INTRODUCTION TO THE QCC AND 2017 TIP ECOSYSTEM BUILDING FORUM  Gilles Duruflé <i>Executive Vice President, Quebec City Conference President, TIP Ecosystem Building Forum</i>	Ballroom – 2 nd floor
8:40 am	THE AI CHALLENGE AND OPPORTUNITY  Sharad Sachdev <i>Managing Director Artificial Intelligence Lead – North America Accenture</i>	Ballroom – 2 nd floor

ONTARIO: FUTURE READY

.....

A bright spot for global investment – Ontario is attracting attention. In 2016 we celebrated a **50% increase in venture capital investment**, becoming **4th in North America**.

INNOVATION + COLLABORATION = SUCCESS

- Key investments bolster Ontario's leadership in transformative technologies – including the Vector Institute for Artificial Intelligence and Ford's \$1.2B investment in Ontario's car R&D ecosystem.
- We announced a Cleantech Equity Fund to grow our 3,000+ cleantech companies.
- The \$300M Northleaf Venture Catalyst Fund and \$205M Ontario Venture Capital Fund have helped direct billions in funding to high-potential companies, including Ottawa-based Shopify.
- Investment from Google, Communitech and Ontario is establishing the University of Waterloo's Velocity program as North America's largest incubator.

Our unparalleled collaboration between government, academia and industry is supported by the infrastructure needed to turn bold ideas into reality.

InvestInOntario.com

Quebec City is

#1 Worldwide for low operating costs among comparably sized urban areas
(KPMG Competitive Alternatives, 2016)

#2 in the «**Top Canadian Metros**» ranking to establish a business
(Site Selection Magazine, 2013)

IN THE TOP 10 of «**American Cities of the Future 2017-2018**»
(FDI Magazine, 2017)

#2 overall in Canada, 5th overall in North America

#1 for economic potential in Canada, 7th in North America

#1 for human capital and lifestyle in Canada, 4th in North America

Participants

Bahan, David

Assistant Deputy Minister Corporate Tax Policy, Economic Development and Government Corporations

Quebec Ministry of Finance

Canada

David Bahan currently holds the position of Assistant Deputy Minister Corporate Tax Policy, Economic Development and Government Corporations at the ministère des Finances du Québec. His responsibilities include the coordination of policies relating to venture capital. M. Bahan has 15 years of experience in the public sector and holds a MA in economics from the University of Montréal.

Bannister, Janet

General Partner

Real Ventures

Canada

Janet is passionate about helping entrepreneurs and their businesses reach their full potential. Her background is a combination of founding and building successful entrepreneurial ventures and making an impact at leading companies such as Procter & Gamble, McKinsey & Co., and eBay. Janet is a General Partner at Real Ventures, Canada's largest and most active early-stage venture capital firm. Janet has led investments in a dozen companies and works actively with Real's portfolio companies to help them accelerate growth and create meaningful impact. Janet launched Kijiji.ca and grew it to become one of the most visited websites in Canada. Subsequently, she led the Kijiji Global business, accelerating growth in North America, Europe, and Asia. Prior to launching Kijiji, Janet was at eBay in Silicon Valley where she led multiple "non-collectibles" categories and helped transform eBay from a collectibles to a mainstream marketplace. She also founded and built a successful consulting business and was CEO at a Toronto-based start-up in the online content and commerce space. Janet was a varsity long-distance runner and competed internationally in triathlons. Today she balances her active lifestyle with being a wife and mother to her eleven-year old son.

Bernier, Jacques

Managing Partner

Teralys Capital

Canada

Mr. Bernier is Managing Partner and Founder of Teralys Capital, a fund of funds whose limited partners are Québec Gouvernement, Caisse de Dépôt et de Placement and Solidarity Fund QFL. With the Solidarity Fund QFL since 2004, Jacques Bernier has been Senior Vice-President, Information Technologies, Telecommunications and Industrial Innovations until May 31st 2008 and has act as the gatekeeper for the fund of funds activity. An engineering graduate from École polytechnique in 1979, Mr. Bernier is behind the creation of the Industrial Innovation Center of Montréal. He was also co-founder and CEO of BGH Planning, a software developer, and co-founder and Vice-President of OMPVE Technologies, a manufacturer of semi-conductors. Mr. Bernier helped found Téléport de Montréal, a Québec beacon in the telecommunications sector, and served as its President from 1987 to 2002. Before joining the Solidarity Fund QFL, he was President of Mégapoint, a holding company in the high-tech sector, and Chairman of the Board of LxSix Photonics, a leader in new production processes in fibre-optic communications and optical sensors. Over the past 29 years, Mr. Bernier has demonstrated his expertise—both in Canada and the U.S.—in launching businesses, financial engineering, business development, growing investments, scouting for new markets and defining innovative business strategies. Mr. Bernier is also a member of the Board of Director and executive committee of the CVCA.

Boisjoly, Sebastian
Director, Venture Capital and Investment Funds

Investissement Québec
 Canada

Mr. Sebastian Boisjoly joined the Investissement Québec team in 2003. In addition to holding the position of Director, Venture Capital and Investment Funds, he has also served as Chief Executive Officer of FIER Partners since 2010 and of the Relève Québec Fund since its creation in November 2011. His primary responsibility is managing the team that negotiates and sets up venture capital investments and various investment funds on behalf of Investissement Québec. Since his appointment, Mr. Boisjoly has played an active role in establishing several large investment funds as well as venture capital investments in a variety of industries. Mr. Boisjoly is a lawyer and holds a bachelor's degree in Economics and Financial Management as well as a master's degree in Taxation from HEC Montréal. His past experience includes positions with national public accounting firms and at the Ministère des Finances du Québec.

Bordeleau, Richard
President

Fonds Innovexport
 Canada

Richard Bordeleau is president of Innovexport, an investment fund supporting Quebec-based innovative start-up companies targeting international markets. His career was focused on growing and helping grow innovative companies on a worldwide basis. He started as a consultant in marketing and corporate strategy for high-tech companies before investing and taking executive positions successively in Aeterna Laboratories, Atrium Innovations and BioCad Medical. He is shareholders of a number of emerging companies in various sectors and is currently Executive Chairman of the Board of Icentia, a medical device company. He is playing an active role on few Board of Directors but prefers being on the front lines on management committees or advisory boards, working closely with young entrepreneurs. He offers consulting services in corporate strategy and is always available to help on economic development issues. He holds a Bachelor degree from Laval University and a diploma from HEC Paris in Corporate Strategy for Executives.

Brenier, Jason
Director of Conversational Business and member of the Impact Team

Georgian Partners
 Canada

Jason Brenier is the Director of Conversational Business and a member of the Impact Team at Georgian Partners. He leads the development of conversational business investment thesis and works closely with portfolio companies to integrate natural language processing, machine learning and artificial intelligence into messaging products and conversational interfaces. Jason has more than 15 years of experience applying advanced analytics, computational linguistics and machine learning to business problems in the financial services, pharmaceutical and legal domains. Prior to joining Georgian Partners, Jason held business analytics and technology leadership positions in management consulting, enterprise software and start-ups. Throughout his career, he has served as CTO at an early stage machine learning startup, led Ernst & Young's forensic data science team, and held advisory positions with a number of artificial intelligence and analytics companies.

Cadete, George
Director

Ontario Provincial Government - Ministry of Research, Innovation and Science & Ministry of Economic
 Canada

Carle, Sylvain
Partner

Real Ventures
 Canada

Sylvain Carle lives and breathes emerging technologies. For the last 20 years, he has thrived with marvel and fun at the confluence of media, technology and networks. Serial entrepreneur for 15 years, as CTO and co-founder at Messagia, Interstructure, Praized and Needium. Before joining Real Ventures he was Senior Developer Advocate at Twitter in San Francisco. He is convinced that technology will change the world for the best in this era of the networked society.

Cegelski, Mike
Managing Partner

500 Startups Canada
 Canada

Mike Cegelski is a Managing Partner for 500's Canada fund. From successful entrepreneur to angel investor and mentor, it's all about passion! Mike gets involved where it counts and where he can bring value. An entrepreneur with Beltron from 1984 to 2000 and iBwave from 2003 to 2015, and an investor and mentor in over 30 companies in the past 10 years. Mike is visibly involved in the angel investing community through Anges Quebec and many other initiatives. Nurturing entrepreneurship is his gift!

Chenette, Madeleine
Office Managing Director, Montreal

Accenture
 Canada

Prior to her role at Accenture, Madeleine Chenette was Head of Strategy Service line in KPMG Canada, Chair of the Board of SECOR Group, an international strategy and management consulting firm and Board Member of Transat A.T. inc. an integrated tour operator. Instrumental in the growth of Secor Group, an international strategy and management consulting firm, where she has been Quebec managing partner and Global Lead of all intellectual capital enhancement and development for the Group, prior of being the Chair. She is a respected and engaging speaker for international conferences on trends and new best practices. Madeleine's compelling views of business challenges are based on extensive global research and twenty years of experience in diversified sectors such as retail, natural resources, energy and finance. Under her leadership, a unique team of savvy business people, creative strategists and executives of top organizations wake up everyday to push back frontiers and win the new market race. National and international clients from TSX listed, Fortune 500 and crown corporations look to her teams to develop their innovation and leadership capabilities. Madeleine holds a Master of Science in Administration from the École des Hautes Études Commerciales in Montreal and Certified Corporate Director 2011 - Institute of Corporate Directors. An eclectic sportswoman, Madeleine also values business and community involvement. She has been president of Fundraising of Herstreet Montreal, president of the Board of Directors of the Montreal Canadian Club, and led pro bono strategic reflection, for the Orchestre Symphonique des jeunes de Montréal, the Women in Finance, the YWCA and, sponsored the fundraising events of Foundation of Greater Montreal and Les filles électriques. At the Gala for "Les Talentueuses", the Association of Quebec Women in Finance awarded its Inspiration price in 2011 and in 2013, the Great Mentor award. She is one of Canada's most powerful top 100 women.

Dhalla, Omar
SVP corporate innovation

Element AI
 Canada

Omar was the first person on the ground in Ontario for both Element AI and Real Ventures. In his role with Element AI, he is focused on bringing AI-first solutions to corporate partners. Omar started his career with Accenture and McKinsey, then co-founded and operated early-stage ventures in both the packaged goods and media industries. He holds an MBA from the Richard Ivey School of Business at Western Ontario and teaches in University of British Columbia's EMBA program.

Douville, Elizabeth
General Partner

AmorChem Financial Inc.
 Canada

Dr. Douville joined GeneChem in 1997 as a Manager of the Technologies Fund and was promoted to Vice President in 2001 with the raising of their Therapeutics Fund. In 2006, Dr. Douville became General Partner with the raising of their third fund, AgeChem. As of January 2011, Dr. Douville is co-managing the fourth and latest venture fund, AmorChem. Dr. Douville is an active board member of Alethia Biotherapeutics and she was an active member of the boards of directors of Cytochroma Inc., Ambit Biosciences Inc., LymphoSign Inc. and Chronogen Inc. and was also a board member of Idun Pharmaceuticals Inc. before its sale to Pfizer in 2005. Elizabeth obtained her Ph.D. in biochemistry at the University of Ottawa (1994), studying the role of protein tyrosine kinases in oncogenesis. She then received postdoctoral training at the Imperial Cancer Research Fund in London (U.K.) from 1994 to 1997 where she studied oncogenes and their signal transduction pathways. In 2008, Elizabeth obtained a business certificate degree as part of the "Programme de perfectionnement des cadres supérieurs" (an Executive management and training program) offered by CIREM in collaboration with HEC/University of Montreal.

Dubé, Mélanie
Economic Policies and Venture Capital Advisor

Quebec Ministry of Economy, Science and Innovation
 Canada

Mélanie Dubé has been working as a Policy Advisor at the Government of Québec since 2002. During these years, her responsibilities mainly referred to corporate financing, either relating to the interventions of the Government in the capitalization of investment funds, or by different government corporations, or through measures of support for the capitalization of corporations. She also took part in the elaboration of government policies, as well as in various special mandates. She now works for the Ministère de l'Économie, de la Science et de l'Innovation du Québec, where her role is primarily to participate in the elaboration of policies, strategies and action plans in economic development to foster the start-up and growth of innovative companies in Quebec. She is the official representative for venture capital at the ministry and she contributes to the implementation of investment funds involving the Government and its different partners. She also takes part in special mandates, as well as various analysis and recommendations to the high authorities in economic development, such as venture capital and the funding of technological innovations.

Duruflé, Gilles
President

QCC Tech Innovation Platform
 Canada

Dr Gilles Duruflé is an independent consultant advising venture capital and private equity funds, institutional investors and governments. He is also Executive Vice-President of the Quebec City Conference and President of its Tech Innovation Platform (formerly Public Policy Forum on Venture Capital and Innovation). He was until 2004 Senior Partner at CDP Capital Technology Ventures, the venture capital subsidiary of the Caisse de dépôt et placement du Québec, in charge of the Funds of Funds portfolio, investing in North American and European VC funds. He was previously Head of strategic studies at the Caisse de dépôt et placement du Québec. From 1979 to 1991, he worked as Senior Partner in strategic consulting firms in the CDC Group (Caisse des dépôts et consignations, Paris) in Africa, Europe and North America. He sits on the Board of the Quebec City Conference. Dr Duruflé obtained his Masters in Philosophy from the CERP (Paris), his Ph.D. in Mathematics from the Paris VI University and the Diploma of the Centre d'Études des Programme Économiques (Ministry of Finance, Paris). He is a CFA and has published numerous books and articles on various subjects related to economics and finance.

Flanagan, Kara
Venture Capital Funds Initiative Manager

British Columbia Ministry of International Trade
 Canada

Ms. Flanagan has a Master's Degree in Economics from the University of Victoria and in 2013 was recognized as one of 50 alumni who have made a difference as part of the university's 50th anniversary celebration. Ms. Flanagan works for the BC Government in the Ministry of International Trade as the Venture Capital Funds Initiative Manager with key mandates including the \$100 million BC Tech Fund. Ms. Flanagan has worked with the Bank of Canada and investment firms with up to \$100 billion in assets. Ms. Flanagan has extensive experience providing investment due diligence to prospective investors on large scale private and public investments. While working in asset management, she co-managed over \$1 billion in accounts. She has worked on a variety of financial deals, particularly in the media sector, where she has assisted clients in media transactions in public and private financial markets. Her experience in financial and credit analysis as well as investment due diligence provides her with a solid foundation as to how to ascertain the value and risk of investments. As a consultant, she adds value in helping companies recognize opportunities for growth and how to develop new business lines for businesses in industries such as finance, film and education.

Frankel, John
Founding Partner

ff Venture Capital
 USA

John Frankel is the founding partner of ff Venture Capital. He founded the firm in 2008 and has been a seed- and early-stage investor since late 1999. John focuses on advising and growing technology and technology-enabled companies across emerging industries, including artificial intelligence, cyber security, drones, enterprise software, crowdfunding, and data analytics, among others. He has served on the boards of more than 35 companies and has led investments in more than 80 companies, including Cornerstone OnDemand (CSOD), Indiegogo, Ionic Security, Unikey, Skycatch, Plated, 500px, Distil Networks, Pebblepost, and Owlet. John also sits on The NYU Tandon School of Engineering's Board of Overseers. Prior to founding ffVC, John worked at Goldman Sachs for 21 years in a variety of roles that involved technology development, reengineering and capital markets. At Goldman Sachs, he worked closely with some of the world's leading hedge fund managers and developed a keen understanding of emerging technologies and portfolio risk/return management. John started his business career in London with Arthur Andersen having earned a Master of Arts from New College, Oxford, where he studied Mathematics, Philosophy and Logic. He is a Fellow Chartered Accountant of the Institute of Chartered Accountants in England and Wales.

French, Jon
Director of Marketing and Communications

NEXT Canada
 Canada

Jon joined The Next 36 (now NEXT Canada) in April 2011 and is responsible for marketing, communications and recruitment with an emphasis on attracting high potential entrepreneurs to the organization's three programs. Jon manages relationships with prospective applicants, student organizations, national partners, university representatives and members of the start-up community. Prior to joining NEXT Canada, Jon was Associate Director, Career Information with the Institute of Chartered Accountants of Ontario (ICAO) where he spent almost ten years promoting the CA designation to students across Ontario. He has served on the Board of Directors for the Canadian Association of Career Educators & Employers and is on the Advisory Boards for Venture for Canada and the MLSE Foundation: 3TO6 Team. Jon has an MBA from the Schulich School of Business at York University, a BBA from Wilfrid Laurier University and an International Business Diploma from Vaxjo University in Sweden.

Gaudet, Isabelle
Economic Policy Advisor

Quebec Ministry of Finance
 Canada

Isabelle Gaudet completes her MBA degree at Dalian University of Technology in China after obtaining her BAA Degree at HEC Montreal in collaboration with the Helsinki School of Economic and Business Administration in Finland. She joined the Quebec Ministry of Economy Development, Innovation and Export trade in 2008 as an Economic Policy Advisor. Now working at the Quebec Ministry of Finance, she is mainly involved in the analysis and recommendation to the ministry authorities on different subjects such as venture capital and financing of innovation and technology.

Gauthier, JF
CEO

Startup Genome
 USA

JF Gauthier is CEO of Startup Genome, an organization that works with local leaders and governments all over the world to accelerate the growth of their startup ecosystems through evidence-based policymaking. Based on the voice of 10,000+ entrepreneurs, 300 local partner organizations and with more than 40 member cities, Startup Genome has built the largest multi-year research on what fuels the growth of startup ecosystems. JF has authored the recent Global Startup Ecosystem Report 2017 and authored Compass' startup ecosystem reports. Based in Silicon Valley for 20 years JF has led companies active in the Tech, Life Sciences and Cleantech sectors. Most recently he was COO for Compass (recently acquired by Sage), the leading benchmarking solution for ecommerce merchants.

Giguère, Luc
Senior Lecturer and Entrepreneur in Residence

ETS
 Canada

I am a Serial-Entrepreneur & Lecturer with a focus on new business development and “turn-around” with 25 years experience in Technology, Consulting, and Investments. I'm currently Senior Lecturer at École de Technologie Supérieure where I'm also in charge of the Start-Up Accelerator. Previously at OMsignal, I was VP Corporate Development, where I worked on Go To Market strategies and negotiations with the clothing industry major players. OMsignal has developed bio-sensing clothing that connects seamlessly with mobile devices. I did the restructuring of Biocognisafe, a company developing methods and devices to detect fatigue & sleepiness of drivers and workers in situations where their safety or the safety of a population is at stake. Previously, I did technology consulting at Grant Thornton. In 2003, I completed the Trium Executive MBA, a joint program between the LSE, NYU Stern and Paris HEC, rank #1 in the World by the Financial Times. After finishing my MBA, I started Oh! Airlines, the forerunner of the business-class-only-airline. From 2000, I worked for Schlumberger where I integrated telweb operations, first in London and then in Paris in the Telecom Division. Telweb was my first business, started in 1991, just out of university without any cash at hand. We developed PC-based credit card validation software. In 1994, we obtained VC financing from Technocap and Innovatech and started supplying “multimedia pay phone” to telecom companies worldwide. In 1998, we launched the world's first webpayphone. After successful deals with major telcos around the World, telweb was acquired by Schlumberger in January 2000. With proceeds of the transaction, I founded Planet 31 Investments an angel fund with successful exits such as Lyppo Systems, sold to Transcontinental; and Yotta-Yotta sold to EMC. I have given conferences and lectures at McGill University, The LSE and at École de Technologie Supérieure and I am involved in my MBA alumni activities

Godbout, Martin
President and CEO

HODRAN, inc.
 Canada

Dr. Godbout was the President and Chief Executive Officer of Genome Canada from April 2000 to October 2009, and before that he was Senior Vice President at BioCapital and President and General Manager of Société Innovatech Québec. Between 1996 and 2004, he was a member of the Board of the “Conseil de la Science et de la Technologie du Québec” and he has been an Advisory member of several Canadian biopharmaceutical venture firms such as SGF Santé, Société Innovatech du Grand Montréal and Royal Bank Ventures Inc. In 2005, Dr. Godbout was appointed Officer of the Order of Canada. He was also awarded the Grand Prix de Recherche from the Québec Foundation for Mental Disorders for his previous work on Alzheimer’s disease in 1991 and the “Prix Summa” in 1994 from the Faculty of Science and Engineering of Université Laval. In 1994, he also founded BioContact Québec which has become one of the most important biopharmaceutical symposiums in North America. He holds a B.Sc. in Biochemistry and a Ph.D. in Physiology and Molecular Endocrinology from Université Laval. In March 2006, Dr. Godbout was shortlisted by the editors of Nature Biotechnology, as one of twenty nominees who have made the most remarkable and influential contribution to biotech in the past ten years in the category “Biobusiness in the rest of the world.”

Haney, Craig
Head, Corporate Innovation

Communtech
 Canada

I am currently the Director of Corporate Innovation for Communtech. My role here is to help make our large Enterprise Companies more innovative and productive by connecting them to productive ecosystems. Prior to Communtech, I ran the Canadian Tire Innovations team at the Communtech Hub.

Hazelden, Mark
Senior Director, Partnerships and Projects

Brookfield Institute for Entrepreneurship + Innovation
 Canada

Mark Hazelden is the Senior Director of the Brookfield Institute for Innovation and Entrepreneurship, a new institute dedicated to studying and strengthening the country’s innovation and entrepreneurship ecosystem. Mark spent the last decade working with senior decision makers across the private, not-for-profit, and government sectors to develop and implement innovation policy. Prior to joining the Brookfield Institute, Mark worked within the Government of Ontario, most recently as the Director of Economic Policy for the Premier of Ontario. He also spent time at Communtech, which convinced him of the need to focus efforts locally, provincially, and nationally on supporting the vibrancy of Canada’s entrepreneurship ecosystems. Mark has a Bachelor of Science in Biology from McMaster University.

Helander, Michael
CEO

OTI Lumionics Inc.
 Canada

Michael received a B.A.Sc. degree in Engineering Science and Ph.D. degree in Materials Science & Engineering from the University of Toronto. He has published 104 peer reviewed publications, 8 patents and 2 book chapters. He is a Visiting Scientist at the Xerox Research Centre of Canada and is a Governor General Gold Medal winner, Vanier Canada Graduate Scholar, and Chorafas Prize winner. Michael is currently Co-founder and President of OTI Lumionics Inc., an advanced materials start-up company working on low cost manufacturing solutions for organic LED (OLED) lighting and displays.

Hervé, Xavier-Henri
Director & Founder

District 3 Innovation Center
 Canada

Xavier-Henri Hervé is a senior leader and mentor with 25 years track record for transforming B2B strategic plans for innovations into sales and execution on an international scale. Hervé enjoys a worldwide network built in over fifty countries in Europe, Middle-East and Africa (EMEA), the Americas at large, and the Asian markets, with notably great success in China. An engineer, Hervé leverages 20 years of experience in several technology and engineering intensive domains such as aviation, information systems, simulation and greentech, at Mechtronix, Oracle Corporation, CAE Electronics and Bombardier.

Hogan, Brenda
Senior Investment Manager

Ontario Capital Growth Corporation
 Canada

Brenda M. Hogan is the Senior Investment Manager with the Ontario Capital Growth Corporation (OCGC). OCGC is a limited partner in the \$205 million Ontario Venture Capital Fund and the Northleaf Venture Catalyst Fund, a \$300 million fund of funds. OCGC manages and operates the Ontario Emerging Technologies Fund (OETF), a portfolio of 20 high-potential tech companies. Previously, Brenda was in corporate development, finance, and strategic investing with Bell Aliant, EY, the Business Development Bank of Canada, and a software start-up. Brenda Co-Chair of Canadian Women in Private Equity (CWPE), served on the Board of Women in Capital Markets, and is a founding member of the Royal Ontario Museum Young Patrons Circle (YPC). Brenda holds an MBA in finance, is a graduate of the Rotman School of Business SME Board Effectiveness Program, and has received leadership training from the Ivey School of Business.

Holzbaur, Inès
General Partner

AmorChem Financial Inc.
 Canada

Inès Holzbaur is a general partner at AmorChem, a life sciences venture capital fund. In 2011, she participated in the origination and establishment of AmorChem's disruptive model for financing very early-stage drug development projects. As part of the fund's activities, she played an important role in the closing of a strategic alliance with the pharmaceutical company Roche and the sale of a portfolio asset to Vertex Pharmaceuticals. She is also the chairman of the board of NuChem Therapeutics inc., a medicinal chemistry CRO founded by AmorChem. She began her career in 1999 as a manager and then vice-president of the GeneChem and AgeChem venture capital funds. During this period, she financed several companies in Canada, the US and Europe. As a result, she has held positions on the board of a number of companies, including BioVex inc., which was sold to Amgen for \$1B and Argos Therapeutics inc., which recently obtained a NASDAQ listing. She received a bachelor's degree in chemistry from Concordia University and a Ph.D. in chemistry from Cambridge University in the UK in 1998.

Hunter, Wally
Managing Director

EnerTech Capital
 Canada

Wally has been investing in Energy Technology for over 15 years. He runs EnerTech's Canadian operations from Toronto. His specific areas of focus include opportunities in Energy Management and Building Automation & Control, Oil & Gas Technologies (including Digital Oil Fields), Power electronics, Advanced materials, Water treatment Technologies in Energy, Software & Internet of things (IoT). Prior to EnerTech, Wally was a Managing Director with RBC Capital Partners where he was responsible for the bank's Venture Capital fund (Energy Technology and Advanced Technology Fund) which was part of RBC's Investment Banking Division (RBC Capital Markets). He has an extensive background in the Venture Capital business which includes a series of successful IPO's, M&A and turnaround transactions throughout his 20 year career in the finance business. In addition to Wally's extensive finance background, he previously produced and hosted the weekly financial television show "Money Week" which featured over 200 guest interviews from Canadian and U.S. money managers over a 14 year period. He was also involved in politics and sat as a local Councillor in the Town of Milton (three terms) and on the Board of the Ontario College of Pharmacists (Chair of finance). Wally was past Chairman of the Banff Venture Forum Cleantech Stream and Chairman of the 2014 Canadian Venture Capital Association conference in Ottawa in May of 2014. He sits on the board of the Canadian Venture Capital Association (CVCA), Venture Capital Association of Alberta (VCAA), Sustainable Development Technology Canada Governing Board (SDTC) as well as EnerTech portfolio companies FilterBoxx, N-Dimension Solutions, HPC Energy Services and Western Oilfield Equipment Ltd. Wally was previously an observer on the Board of Distech Controls prior to the sale of the company to Acuity Brands for \$318 Million CDN. Wally received a BA from the University of Western Ontario and has completed a number of securities-related courses and programs including the Canadian Securities Institute (CSC program) and Canadian Investment Finance (CIF I, II & III).

Johns, Brad
Partner

Yaletown Partners
 Canada

Brad brings 27 years of operating, business development, private equity and venture capital experience in the Information Technology and Energy sectors to Yaletown. He currently has responsibility for five Yaletown portfolio companies, serving as a Director at Chaordix, and as a board observer at Showbie, nFluids, Pretio and LoginRadius. He also led the Fund's realized investment in Monexa which was acquired by Netsuite in 2015, and co-manages the recently launched Accelerate Fund which focuses on early stage technology companies in Alberta. Previously he was Vice President of Business Development for Moneta Energy Services, a private natural gas storage and marketing company, Brad also worked in private equity, as a Partner with Moneta Capital Partners where he managed IT and Oil and Gas Technology investments, and as Vice President with Launchworks where he managed IT investments. Brad's career experience includes manufacturing operations, product management, business development, private equity and venture capital in both the IT and Energy sectors. As the Senior Partner at Moneta Capital Partners, he was responsible for investments in IT and Oil and Gas Technology companies. As Vice President at Launchworks, an IT-focused venture capital firm based in Calgary, he was a key contributor to the investment performance of the fund. Brad's operating experience includes a decade as an engineer and manager with Nortel, and then as an executive with two technology start-ups. Brad has a Bachelor of Science Degree from Queen's University, a Masters in Engineering from McMaster University and an MBA from INSEAD, consistently ranked among the top ten business schools globally.

Keefe, Patrick
Partner

Build Ventures
 Canada

Patrick has over 15 years of investment and entrepreneurial experience. As vice president of investment at Innovacorp, Patrick oversaw the organization's seed and early-stage venture capital activities. Previously, Patrick held senior positions with Boston-based venture capital firm Atlas Venture and the Boston Consulting Group, which provides strategic advisory services for leading companies around the world. Patrick holds an M.Phil from Oxford University and an MBA (Distinction) from Harvard Business School.

Kerami, Moe
Managing Partner

Vanedge Capital
 Canada

Moe focuses on investments in the areas of cloud computing, machine intelligence, analytics, and cybersecurity. Moe was a Vice President of NetApp, a leading provider of enterprise data storage solutions. Prior to that, Moe was President and CEO of Bycast Inc., a leader in storage virtualization software for cloud and object storage. During his tenure at Bycast, Moe led the company from a seed stage startup to a profitable market leader with a global customer base. Bycast was successfully acquired by NetApp in the spring of 2010. Moe has extensive experience working with entrepreneurial companies and taking to market leading-edge technology products. Moe is a recipient of Business in Vancouver's "Forty Under 40" and British Columbia Technology Industries Association Person of the Year award for 2011. Moe holds a M.Sc. and a Ph.D. in physics from the University of British Columbia and holds several US Patents for his past technical work.

Kondo, Kenya
Director of Industry Development

Alberta Enterprise Corporation
 Canada

Kenya Kondo has over ten years of experience in international marketing and strategic planning focused on initiatives for Canadian based interests in a number of countries in the Middle East, Africa, and South East Asia. He has worked with several startups including the crowd sourced problem solving platform Hive Wise, led the development of the marketplace platform Get Neighbour and most recently, co-founded the spin off venture MatchWork, a SaaS platform for the not for profit sector. He currently is the co-founder of Edmonton's Founders' Friday, which brings together some of the most innovative tech entrepreneurs in the city, to create a collaborative forum for start-up success. Kenya attained his MBA degree from Cornell University in 2015 and his undergraduate degree in Mathematics & Physics from the University of Alberta in 2005.

Kuyan, Steven

Vanedge Capital was the largest shareholder in Recon Instruments, sold to Intel; Wurdtech, sold to General Electric; Metafor, sold to Splunk; and Mediaco, sold to Workday.

Lubik, Sarah
Director of Entrepreneurship

Simon Fraser University
 Canada

Dr. Sarah Lubik is Simon Fraser University (SFU)'s first Director of Entrepreneurship, promoting the power of, and need for, interdisciplinary teams and commercialization of research to solve wicked global problems. She is co-Champion of the Technology Entrepreneurship@SFU program, a lecturer in Entrepreneurship and Innovation in Beedie School of Business and a researcher in university entrepreneurship, including incubation, spin-outs, commercialization and innovation ecosystems. Her work has been featured in journals such as Long Range Planning, R&D Management and Innovation Management: Policy and Practice. She has experience coordinating pan-European startup support programs focusing on key areas such as coaching, funding and clusters, is a certified expert business coach and is the co-founder and marketing director of a high-tech startup: Lungfish Dive Systems. Sarah has been named one of Business in Vancouver's Top 40 under 40 and an Innovation Leader by the Government of Canada. This year, she has been noted in BC Business magazine's Women of Influence issue and been named a finalist for the 2017 YWCA Women of Distinction in Education, Training & Development. Sarah holds a BBA (honours) from SFU and a masters and PhD from the University of Cambridge.

Lysne, Alan
Managing Director

Ryerson Futures Inc.
 Canada

Alan has been a co-founder, CEO, CTO, and COO of a number of technology businesses, and has been working with startups for well over a decade. Currently, Alan is Managing Director of Ryerson Futures operating a seed fund and accelerator program in Toronto and India. Alan was the CEO of a venture-backed mobile company that was acquired by Grapple Mobile, now Monitise PLC. After the acquisition, he served as COO and led the Toronto office, with a focus on business development and the technology platform. Prior to that, Alan was co-founder and CTO of Davinci Technologies that was acquired by CSG Systems (now Comverse Technology) where Alan served as an Executive Director and led a global team in the U.S., Canada, France, India and China. Alan has an undergraduate degree in Electrical Engineering from Queen's University.

MacIntosh, Alan
General Partner

Real Ventures
 Canada

Since the mid-90s, Alan MacIntosh has been helping build, operate and invest in entrepreneur-led technology businesses at the intersection of mobile and the Internet. Earlier in his career, he worked for innovative international companies in oilfield exploration with Schlumberger, product management with Hewlett Packard and mobile communications with the Telesystem group. As a venture investor, Alan co-founded GSM Capital, the first global wireless venture fund, with notable investments including Saraïde (acquired by Infospace) and Paypal. As a founding partner in Acta Wireless, he chaired OZ Communications (acquired by Nokia), co-founded Millennial Media (NYSE: MM, acquired by Verizon AOL) as well as Real Ventures, Canada's largest and most active seed fund. Alan contributes to the community as President of the OSMO Foundation (Notman House), a Trustee of the McCord Museum, board member of Montréal's Quartier de l'Innovation (QI) and founding sponsor of the Mobile Giving Foundation. A native of Scotland, keen cyclist and lifelong skier, Alan holds a BSc (Hons) in Offshore Engineering from Heriot-Watt University and an MBA from INSEAD.

Manella, Angelique
Associate Vice-Principal, Innovation and Partnerships

McGill University
 Canada

Angelique Mannella is McGill's first Associate Vice-Principal of Innovation and Partnerships. In this role, Ms. Mannella has a mandate to promote and expand McGill's innovation agenda by creating new partnership and entrepreneurship opportunities for McGill researchers. Her team, which currently encompasses the groups Invention Development & Entrepreneurship Assistance (IDEA), McGill University Business Engagement Centre (MUBEC), and Innovation in Practice, works to create a bridge between research and application, by providing opportunities for both students and researchers to orient their work toward engaging with social or market challenges outside the academy. Before taking on the role of AVP in June 2016, Ms. Mannella advised corporate clients and venture capital firms on R&D commercialization, investments, and joint ventures. Previously, she was the founder and CEO of Decode Global, a social enterprise that developed mobile games. She has 15 years of experience in technology product design and business development, and has worked for companies such as Cisco Systems and Nokia in North America, Europe and Asia. Ms. Mannella is a professional engineer, and has degrees from McGill University (BEng), the London School of Economics (MSc), and INSEAD (MBA). She is also an Entrepreneur-in-Residence with the Digital Entrepreneurship Program at the World Bank Group in Washington D.C.

Marcoux, Jean-Francois
Partner

White Star Capital
 Canada

Jean-Francois ("JF") Marcoux has 16 years of experience in managing start-ups and investment projects. He was the co-founder of Ludia, a leading digital videogame publisher, and managed all non-product related operations including Finance, Legal, Strategy and HR. JF gained extensive operational experience with his role at Ludia which grew from a startup in 2007 to a highly profitable 220 employee company today. Ludia was acquired in late 2010 by FremantleMedia, a leading global TV producer. Prior to co-founding Ludia, JF held senior positions in mergers and acquisitions, financing and venture capital in the media and technology sectors, with a large publicly-traded media and printing company, a leading Canadian Investment Bank and one of the largest institutional fund managers in Canada. JF graduated from HEC Montreal, holds an M. Sc. in Finance from the University of Sherbrooke, and is a Chartered Financial Analyst. He divides his time between New York and Montreal.

Martineau-Fortin, Eric
Founder & Managing Partner

White Star Capital
 USA

Eric has over 18 years of investment banking and VC experience. He was a founding member and Partner of Messier & Associés, a leading transatlantic boutique firm in the media and technology space and has been directly involved in more than 50 transactions valued in excess of \$10 billion. Eric also previously worked in mergers and acquisitions at Merrill Lynch in New York and London as well as at ABN AMRO in corporate finance and private equity in Paris, London and Amsterdam. Eric has been doing early-stage investments with White Star Capital since 2007 and has led multiple investments including Ludia, Betaworks, Science and Execution Labs. Eric was born in Canada, is married to a French national and has two American daughters. He and his family divide their time between New York and Western Europe.

Mawson, Janice
Consulting Director

Global Corporate Venturing
 USA

In Mid-January Janice joined Global Corporate Venturing as Consulting Director for the Leadership Society and International Corporate Venture Capital Association. She previously worked as a contractor for Security Innovation Network (a Cyber Security super connector) to assist with Business Development. For 14+ years, Janice was Vice President for the National Venture Capital Association (NVCA). Her role in overseeing membership, business development, meetings, benefits and services is a great asset to GCV. She created their Corporate Venture Capital member subgroup, as well as similar groups for Growth Equity investors and Strategic Marketing and Communications professionals.

Maynard, André

(Hons) from MMU (Manchester, UK) is a citizen of the UK and New Zealand and a Permanent Resident of Quebec, Canada.

Stuart, Terry
Chief Innovation Officer

Deloitte
 Canada

When some of the world's leading brands need to discuss innovation strategies or figure out how to get ready for disruption, Terry Stuart often gets the call. As Deloitte Canada's Chief Innovation Officer, Terry's job is to be a "constructive disruptor", helping both the firm and clients thrive in a world where exponential change is in the driver's seat and is not obeying the speed limit. A creative thinker with an idea every nanosecond, a meeting with Terry leaves people itching to jump out of the present and bounce into the future. Animated and passionate, Terry speaks to audiences across the country and abroad. Terry is a master connector and finds value in meeting with everyone in the innovation ecosystem—he finds inspiration everywhere. Whether Terry is experimenting with his latest Kickstarter purchase, watching a TED video on his deck with his family or attending Singularity University's Innovation Partnership Program in Silicon Valley, he leaves ready to take action and finds others who will join him on his journey. The word innovation can sometimes be used in a cavalier way, but in Terry's mind it matters. Canada's productivity is on the line and innovation is what will propel the country forward to help future generations be successful.

Switzman, Robert
Vice President, Innovation

Rogers Communications
 Canada

Rob has a 16 year history with Rogers Communications and is currently the Vice President, Innovation. Rob's role is to discover and attract innovative companies from around the world, and find suitable opportunities for them across Rogers that deliver on company priorities. He is in constant exploration and discussions with companies that are seeking to transform our products, platforms, customer experience and how Rogers operates, across our Consumer, Enterprise and Media business units. Rob's previous areas of expertise at Rogers include Planning & Development, Emerging Business, Product Strategy, and Wireless Data.
